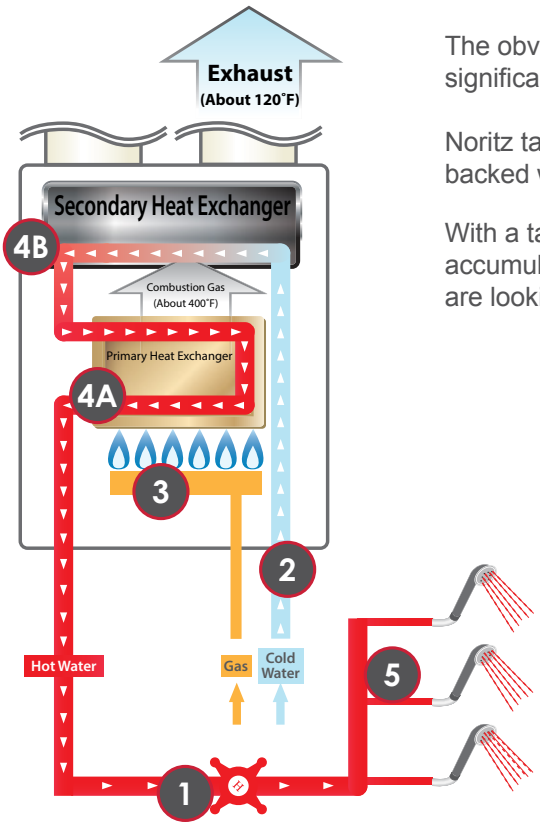
01



HOW TANKLESS WORKS

The obvious difference between a tank and a tankless is its size. Not only will you gain significant space, but you'll also get continuous hot water with a tankless.

Noritz tankless water heaters last longer than traditional tank water heaters and are backed with a 12-year warranty.*

With a tankless, you won't be using hot water that is stored in a tank that can accumulate rust over time. Noritz units also allow you to set the precise temperature you are looking for.

STEP 1
A hot water tap is turned on.

STEP 2
The flow sensor detects the water flow.

STEP 3
The computer automatically ignites the burner.

STEP 4A & 4B
Water flows through the heat exchangers. The burner heats the water to the designated temperature.

STEP 5
The Noritz tankless water heater provides a continuous stream of hot water. When the tap is turned off, the unit shuts off.

*Refer to our warranty terms & conditions at www.noritz.com/warranty for more details.

WHY TANKLESS?

CONTINUOUS HOT WATER

A tankless water heater heats water on demand. That means no storage or shortage of hot water.

ENERGY SAVINGS

A Noritz Tankless Water Heater is up to 30% more efficient than a 50-gallon tank water heater. This means our tankless unit could save you up to 40% of your hot water energy bill.

LONGER LASTING

Noritz tankless water heaters have a typical life of up to 20 years. This can be twice as long as a tank style unit!

CLEAN & FRESH WATER

With tankless you avoid using water that has been stored in a tank with accumulated rust.

SPACE SAVINGS

Tankless hot water heaters take up significantly less room than traditional water heaters. Mount on a wall outdoors or indoors.

02

EZTR40

REVOLUTIONARY TECHNOLOGY

FEATURES

The EZTR40 provides the simplest and most effective installation yet. If you're searching for a direct 30/40 gallon tank replacement the EZTR40 makes it easy by using the existing tank connection and is as simple as swapping a tank for a tankless. The EZTR40 is the first of its kind to use the existing vent system for swift installation.

Most conventional tankless installations require replumbing of the water, gas lines, and reconfiguration of the venting. With the EZTR40 none of this is required so installation time is dramatically reduced. Ask your local plumber if this product is right for you.

NRCP

HAVE HOT WATER AT YOUR FINGERTIPS
Our new NRCP series allows for the very best experience by providing hot water at the fixture when you want it. This avoids wasting precious water waiting for the hot water from the water heater to the fixture. You can specifically set the times of the day your family uses hot water. Our new technology allows for the NRCP series to simply learn your family's use. Smart technology like this makes your life easier and puts money in your pocket.

YOU NOW HAVE THE CONTROL OF YOUR WATER
Have you ever thought about how many gallons of water are being wasted every day waiting for hot water? The typical family in the US wastes thousands of gallons every year. Now with the Noritz NRCP series you have the control. Simply program your family's water use into the digital integrated control and save our environment's natural resources.

We at Noritz are dedicated to offering you and your family the very best experience with hot water. It is in our mission to be responsible with the environments limited resources.

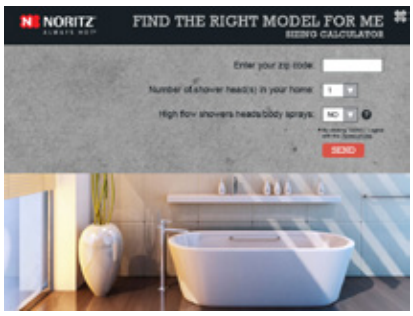
REPLACE A 40 GALLON TANK

Noritz has revolutionized the tankless industry with the new EZTR40. The EZTR vents with flexible vent directly through existing B-Vent with no need to spend time changing existing vent. Water connections are on the top of the heater so now you can use flex lines direct from the top like a tank. 1/2 inch gas line connection to existing line saves time and money. EZ tank replacement the way you always wanted it to be.

Low NOx Low NOx compliant in areas where applicable.

HOW TO GET STARTED
WWW.NORITZ.COM



SIZING CALCULATOR

Noritz provides a sizing calculator as part of its newly updated website at noritz.com. The “Find the Right Model for Me” calculator is intended as an online process designed to identify the correct Noritz tankless model for a given residential application. It provides a baseline that the installer can fine-tune as needed.*

*Only a Noritz-trained, professional contractor can make the final product recommendation and accurately quote the installed cost.

FIND AN INSTALLER

Ready to make Noritz your next water heater? We can help you find the nearest Noritz installer with our online installer search. Simply type in your zip code to begin.

FREE EBOOK DOWNLOAD
WWW.NORITZ.COM/EBOOK

Want to learn more about Noritz and tankless water heaters? Our free ebook provides a definitive guide to inform you and get you started on your path to tankless.

WHY NORITZ?

TECHNOLOGY LEADER IN HOT WATER HEATING

Noritz has been an innovator in the water heating industry for over 60 years. We introduced the first modern, electronically controlled tankless hot water heater in 1981 and we remain the leader in energy savings and superior hot water delivery today.

RESIDENTIAL WARRANTY*

12 FULL YEARS

Noritz offers a 12-year warranty on the heat exchanger and a 5-year warranty on parts and 1-year reasonable labor. Labor will be paid to an authorized Noritz Service Representative on pre-approved warranty repairs.

*Refer to our warranty terms & conditions at www.noritz.com/warranty for more details.

SUPPORT SITE & CALL CENTER

Noritz provides two customer service initiatives - a Technical Support Website and an In-House Call Center - with the goal of delivering information more quickly and efficiently to customers, whether their preferred method is online or the telephone.

REBATE PROGRAM

Many local utility companies are recognizing the benefits of tankless water heaters and are encouraging this through rebates. Check with your installer, local utility company or www.noritz.com/rebates for any available rebates in your area.

ENERGY STAR

ENERGY STAR

By heating water only when you need it, ENERGY STAR qualified tankless water heaters save the typical family more than $100 per year on gas bills compared to a standard storage tank model. Larger families can save even more!
