

Quick Connect Cord Installation Manual

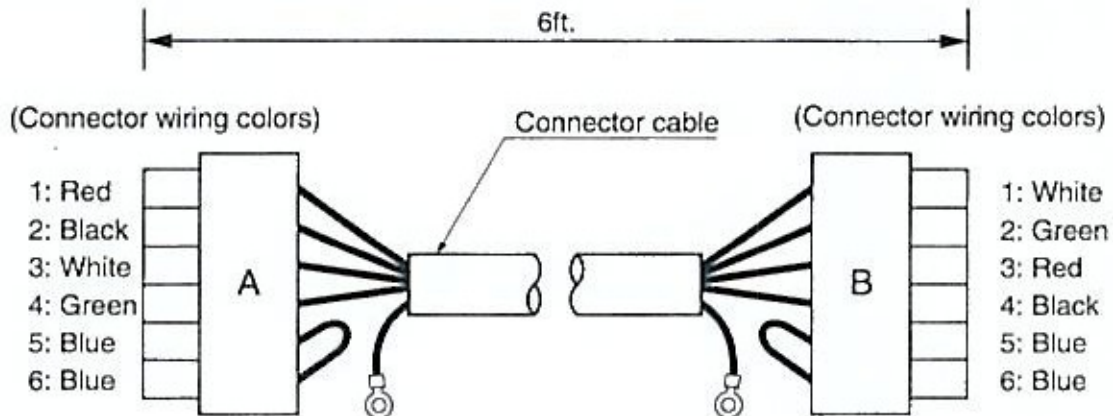

WARNING

Do not attempt to install the quick connect cord before carefully reading this manual.

(Caution)

The wire colors on the connectors on the two sides of the quick connect cord are different, but it does not matter which direction the cord is installed in.

Either side A or side B of the cord can be connected to the unit with the remote controller.

(The wiring colors for connectors A and B are not indicated because they do not matter.)

Connection Procedure

(Perform the following procedure in both units.)

(Check the manual for the appropriate unit for the specifics of the connection.)

1. Turn off power.
2. Remove the front cover.
3. Insert the quick connect cable through the wiring throughway into the unit.
4. Attach the quick connect cord connector to the plug inside the unit.
5. Attach the ground wire of the quick connect cord to the terminal block inside the unit.
(Electrical noise may cause the unit to malfunction if it not properly grounded.)
6. Secure the quick connect cord by clamping it to the terminal block.
7. Close the front cover.
