Notes:

1. Quick Connect Cable is only available for 2 unit Multi-System. When Quick Connect Cable is in use, pump control and tub alarm features are disabled.

2. When connecting 2 devices, use only a single remote controller.

3. Size the piping to allow for the maximum flow rates of the units.

4. Noritz recommends the use of Isolation Kit (IK-WV-5) with installation. These kits include an integrated shut-off and service valve with unions and a pressure relief valve.
